

Effective June 9, 2003, The Hollis Board of Selectmen, following the guidance of the voters at Town Meeting, have selected the following method of computing the load size at the Stump Dump:

The amount of Load equals the Length of bed (L) times width of bed (W) times height of load (H) at its highest point, divided by 27 = cubic yards.

If you have further questions, please do not hesitate to call the Department of Public works at 603 465-2246.
